I'll structure this as a Google Flow / Veo image-to-video production pack: one reusable continuity instruction, followed by individual prompts for all 34 storyboard shots.

For the best results, generate each shot as a separate clip using its approved storyboard image as the starting frame. For shots longer than the generation limit, create multiple short clips rather than asking Flow to sustain a complex action in one take. Use the same approved character, environment, and prop references throughout.

The prompts below preserve the screenplay, Maha's identity, the two visual worlds, and the decision to keep the accident entirely off-screen. All dialogue, instructions, and generated text remain English-only.

Google Flow production prompts

MIRROR MIRROR
Google Flow / Veo — Complete Video Generation Prompt Pack

Production format: 16:9 landscape · Live-action cinematic · 24 fps final edit
Target runtime: 6 minutes 35 seconds
Visual approach: Naturalistic social drama with restrained magical realism
Language: English only

PART 1 — GLOBAL CONTINUITY INSTRUCTION

Use this instruction as the creative foundation for every Flow generation. Attach the relevant approved character, environment, prop, and storyboard references.

```text
PROJECT: MIRROR MIRROR
FORMAT: Cinematic live-action short film
ASPECT RATIO: 16:9
FINAL FRAME RATE: 24 fps
GENERATION METHOD: Image-to-video whenever an approved storyboard frame exists.

DIRECTOR'S VISION:

Create a deeply human, photorealistic social drama set in present-day rural Egypt.

This is not a fantasy film, animated film, music video, or poverty montage. It is an intimate live-action drama about a ten-year-old girl named Maha and the childhood she should have experienced.

The mirror is a restrained magical-realism storytelling device. Its purpose is to reveal two possible childhoods, not to create supernatural spectacle.

CHARACTER IDENTITY — MAHA:
```

Maha is exactly ten years old.
She has a soft oval face, slightly rounded cheeks, a small chin, medium warm olive-brown skin, large deep dark-brown eyes, and naturally wavy dark brown to black shoulder-length hair.

She has one tiny faint scar above her right eyebrow.

Preserve the exact face, facial geometry, eye spacing, nose, lips, ears, hairline, hairstyle, skin tone, age, height, and child proportions from the approved MAHA_01 reference.

Real Maha and Mirror Maha are the SAME child.
They must never look like two different actresses.

Never beautify, age, redesign, or morph Maha's face.
No makeup. No adult proportions. No exaggerated malnutrition.

COSTUME CONTINUITY:

REAL MAHA:
Faded beige cotton tunic, worn dark olive trousers, old dusty sandals, slightly untidy natural hair.

MIRROR MAHA:
Simple sunshine-yellow cotton dress, knee-length and age-appropriate, with one small red ribbon tied into her hair.
When going to school, she carries the same simple school backpack and wears clean practical school shoes.

The yellow dress belongs to Mirror Maha's visual identity.
Never change its color, design, or fabric.

MOTHER:
Same approved woman in every appearance, approximately 36–40 years old, medium olive-brown skin, dark eyes, dark hair tied back or restrained, simple modest clothing. Her performance is loving and emotionally restrained.

FATHER:
Same approved middle-aged man in the mirror-world breakfast scene. Simple faded cotton shirt, short dark hair, subtle stubble.

THE TWO WORLDS:

REALITY:
Muted dusty earth colors, cracked plaster, worn cement, faded fabric, compressed framing, natural harsh sunlight, restrained handheld camera, quiet observational compositions.

MIRROR WORLD:

The SAME home geometry, but clean, safe, and comfortable. Warm natural daylight, cream tones, soft yellow, muted blue, gentle camera movement, ordinary family life.

Do not make the mirror-world luxurious, magical, glowing, or artificially perfect.

ENVIRONMENT CONTINUITY:

Use the approved environment references.
Preserve the exact mirror shape, dark wooden frame, room geometry, window placement, doorways, furniture positions, road, field, truck design, and prop details.

The mirror is always an old rectangular mirror with a narrow dark wooden frame.

CAMERA AND MOTION:

Professional live-action cinematography.
Natural lens perspective.
Physically plausible movement.
Realistic child anatomy, weight, balance, blinking, breathing, hands, hair, and fabric.
Use only the camera movement specified in the individual shot prompt.

Keep movements subtle and emotionally motivated.
No unnecessary gestures.
No random camera movement.
No artificial slow motion.

IMAGE QUALITY:

Natural skin texture.
Realistic fabric weave and hair strands.
Physically plausible lighting and shadows.
Natural highlight roll-off.
Subtle film texture.
Professional cinematic composition.
No plastic-looking AI skin.

STRICT NEGATIVE INSTRUCTIONS:

No face drift.
No identity changes.
No age changes.
No costume changes.
No duplicate characters.
No additional limbs or fingers.
No malformed hands.
No distorted eyes.
No facial morphing.
No changing mirror geometry.

No inconsistent reflections.
No floating objects.
No random props.
No flickering.
No exposure pumping.
No unstable backgrounds.
No sudden camera movement.
No random scene cuts.
No fantasy glow.
No cartoon or animation appearance.
No generated subtitles.
No captions.
No logos.
No watermarks.
No random readable text.

AUDIO:

Do not rely on generated dialogue or generated music.
Keep performances natural and understated.
Generate clean visual footage with natural environmental movement.
Dialogue, narration, music, sound effects, and final mixing will be completed separately in post-production.
```

---

# PART 2 — SHOT-BY-SHOT FLOW PROMPTS

## SCENE 1 — THE REFLECTION
**00:00–00:55**

### SHOT 01 — Black opening
**Timeline:** 00:00–00:08
**Generation:** Static black frame; create the fade-in during editing.

```text
Pure solid black screen.

No visible objects, people, light, gradients, textures, reflections, or text.

Completely motionless black image.
No camera movement.
No animation.

This is the deliberate opening of a serious cinematic social drama.

Hold the black image for the entire clip.
```
```

```

### SHOT 02 — Maha asleep
**Timeline:** 00:08–00:17
**Camera:** Static wide shot, 24mm.

```text
Animate the supplied reference image as a restrained live-action cinematic shot.

A ten-year-old Egyptian girl, Maha, sleeps on a thin blanket on the cement floor of a small deteriorating rural home.

She breathes softly. Her blanket moves almost imperceptibly with her breathing. A tiny natural movement of her head is acceptable.

The room remains still: cracked beige-grey plaster walls, scratched metal cup, torn school notebook, small window, worn cement floor.

Faint blue dawn light enters through the window.

Keep Maha small within the composition.
The camera is completely static.

Mood: quiet, intimate, observational, slightly oppressive.

Do not wake her yet. Do not add movement to other objects.
```

SHOT 03 — Eyes opening
Timeline: 00:17–00:25
Camera: Extreme close-up, 85mm.

```text
Create a realistic extreme close-up of Maha's eyes as she slowly wakes.

Her eyelids open naturally. Her dark brown eyes make one small, quiet adjustment as she focuses.

Her expression is tired, observant, and alert.
A soft dawn shadow crosses her face.

Keep her head almost completely still.
Preserve her exact face and eyebrow scar.

Use natural skin texture and delicate eyelash detail.
No exaggerated emotion.

The camera remains locked.
```
```

End with her eyes fully open and steady.
```

### SHOT 04 — Washing her face
**Timeline:** 00:25–00:35
**Camera:** Medium shot, 50mm.

```text
Maha stands at the simple wash basin in her rural home.

She gently splashes water onto her face once.
Water falls naturally from her hands.
She lowers her hands, pauses, then slowly raises her head toward the old rectangular mirror.

Her movement is quiet and unhurried.

The mirror remains fixed on the wall.
The room geometry and all objects remain unchanged.

Use restrained natural dawn light and a slightly handheld but controlled camera.

End with Maha looking directly toward the mirror.
```

SHOT 05 — The reflection
Timeline: 00:35–00:47
Camera: Over-the-shoulder, 50mm.

```text
A restrained over-the-shoulder mirror shot.

Real Maha stands in front of the old rectangular mirror.

Inside the reflection, the SAME ten-year-old girl appears in her simple sunshine-yellow cotton dress with the small red ribbon in her dark wavy hair.

Mirror Maha has exactly the same face, eyes, eyebrow scar, hairline, and facial proportions as Real Maha.

Mirror Maha looks at Real Maha and slowly develops a small, gentle smile.

Real Maha remains still and tired.
Her expression does not change dramatically.

The mirror reflection must remain geometrically accurate and aligned with the mirror surface.
```
```

The yellow-dress girl must appear inside the glass as a real reflection, not as a separate person standing behind the camera.

Use a very subtle slow push-in.
No glow, particles, magical flashes, or fantasy effects.

End with the two versions of Maha holding eye contact.
```

### SHOT 06 — Fingertips
**Timeline:** 00:47–00:55
**Camera:** Extreme close-up, 85mm.

```text
Extreme close-up of Maha's small hand slowly approaching the old mirror.

Inside the glass, the reflected hand moves in perfect correspondence.

The two index fingertips approach each other and gently meet at the mirror surface.

The contact must be physically believable.
Correct finger anatomy and accurate reflection alignment are essential.

Use a very slow, controlled camera push-in.

Keep the glass surface and dark wooden frame consistent with the approved reference.

End at the exact moment of fingertip contact.

Do not show the mirror breaking.
Do not create a portal, flash, or magical explosion.

The transition into the mirror-world will be created through editing.
```

SCENE 2 — THE CHILDHOOD SHE DESERVES
00:55–02:45

SHOT 07 — Mirror-world bedroom
Timeline: 00:55–01:04
Camera: Wide shot, 35mm.

```text
The same rural home is now a modest, clean, comfortable child's bedroom.

Preserve the original room geometry, window position, doorway, and proportions.

The walls are clean. A simple proper bed, small bookshelf, and children's drawings make the room feel safe and lived in.

Mirror Maha lies in bed wearing her sunshine-yellow dress.

She begins to wake naturally beneath the blanket.

Warm morning sunlight enters through the same window.
A curtain moves slightly in the gentle air.

The camera makes a very slow, smooth push into the room.

This is an ordinary childhood, not a luxury interior or fantasy world.
```

SHOT 08 — Maha smiles
Timeline: 01:04–01:13
Camera: Close-up, 85mm.

```text
Mirror Maha slowly sits up in her simple bed.

She stretches her arms naturally, then smiles with quiet, genuine childlike happiness.

Her smile is small and spontaneous, not posed for the camera.

Preserve her exact approved facial identity, age, hair, and eyebrow scar.

Her yellow cotton dress remains unchanged.

Warm morning light softly illuminates her face.
The camera stays steady.

End with her looking content and awake.
```

SHOT 09 — The red ribbon
Timeline: 01:13–01:22
Camera: Medium close-up, 50mm.

```text
Mirror Maha stands near her bedroom mirror.

She carefully ties the small red ribbon into her naturally wavy dark hair.

Her fingers move slowly and realistically.
She adjusts the ribbon once, checks it, and gives a small satisfied expression.
```
```

Her sunshine-yellow cotton dress remains visible.

Preserve the exact ribbon color, shape, and size.

Use warm natural window light and a steady camera.
Keep her face and hairstyle consistent.

Do not add jewelry, makeup, or additional hair accessories.
```

### SHOT 10 — The backpack
**Timeline:** 01:22–01:34
**Camera:** Medium shot, 35mm.

```text
Mirror Maha picks up her simple school backpack from beside the bed.

She places one strap over her shoulder, adjusts it naturally, and walks out of the bedroom.

Her yellow dress and red ribbon remain exactly the same.

The camera follows her gently from behind and slightly to the side.

Preserve the approved bedroom architecture and doorway position.

Her walk should feel natural for a ten-year-old child.

End as she leaves the bedroom.
```

SHOT 11 — Family breakfast
Timeline: 01:34–01:48
Camera: Medium-wide, 35mm.

```text
A modest family breakfast in the clean mirror-world home.

Maha sits between her mother and father at a simple wooden table.

Her father gently pours milk into a glass.
Her mother serves simple breakfast food.
Maha laughs naturally at a small family moment.

The mother and father retain their approved character identities.

Maha wears the yellow dress and red ribbon.
```
```

Use small, natural gestures only:
a hand passing a plate, a glass being placed on the table, a quiet smile, a brief laugh.

The camera makes a gentle, almost imperceptible lateral move.

Warm natural morning light.
Authentic family intimacy.
No luxury food, expensive furniture, or exaggerated performance.

Do not generate audible dialogue.
```

### SHOT 12 — Friends on the road
**Timeline:** 01:48–02:00
**Camera:** Tracking medium shot, 35mm.

```text
Mirror Maha walks along the modest rural village road carrying her school backpack.

Two or three school friends notice her and wave.

Maha looks toward them, smiles, and begins running to join them.

The friends respond naturally.

Use a smooth tracking camera at approximately the child's eye level.

Show simple village houses and agricultural land in the background.

Preserve Maha's yellow dress, red ribbon, face, and backpack.

The running must be physically believable and age-appropriate.
No exaggerated slow motion.
No large crowd.

End with Maha joining her friends.
```

SHOT 13 — Classroom
Timeline: 02:00–02:13
Camera: Medium shot, 50mm.

```text
Inside a modest rural primary school classroom.

Maha sits at a simple wooden desk.
She raises her hand with quiet enthusiasm.

The teacher notices her and responds with a gentle encouraging smile.

Maha looks toward the teacher, waiting to answer.

Other pupils make only subtle background movements.

Use natural daylight through classroom windows.
A chalkboard and ordinary classroom furniture remain in the background.

Keep the camera steady and the composition natural.

No readable writing, generated letters, subtitles, or logos.
Do not animate mouth movements as if speaking.
Dialogue will be added in post-production.
```

SHOT 14 — Schoolyard play
Timeline: 02:13–02:27
Camera: Wide-to-medium tracking, 35mm.

```text
A small group of children play together in the schoolyard.

Maha runs naturally with her friends.
She loses her balance and falls gently onto the ground.

One friend immediately reaches out a hand and helps her stand.

Maha accepts the help, smiles, and returns to playing.

The action is safe, natural, and unforced.

Keep the number of children limited.
Preserve Maha's exact identity, yellow dress, and red ribbon.

Use a smooth tracking camera with natural child-height perspective.

Bright but soft daylight.
A feeling of freedom, friendship, and ordinary childhood.
No exaggerated falls or dangerous movement.
```

SHOT 15 — Homework with her mother
Timeline: 02:27–02:37
Camera: Medium close-up, 50mm.

```text
Maha sits at a modest table completing homework in a notebook.

Her mother sits beside her and gently points to a part of the page.

Maha writes with a pencil, pauses, then looks up at her mother and smiles.

The mother responds with a small affectionate smile.

Keep their identities and clothing consistent with the approved references.

Use warm afternoon window light.
The camera remains close and steady.

Show realistic pencil contact with paper and natural hand movement.

Do not generate readable writing on the notebook.
```

SHOT 16 — Bedtime
Timeline: 02:37–02:45
Camera: Close-up, 85mm.

```text
Maha lies peacefully in her simple bed.

Her mother leans down and gently kisses her forehead.

Maha slowly closes her eyes.

The mother's movement is soft and natural.
Her expression is loving and calm.

Use warm, low practical bedroom light with gentle shadows.

Preserve both characters' exact identities.

Keep the camera still.
End on Maha's closed eyes.

This shot must provide a clean visual match cut to Real Maha opening her eyes in the next scene.
```

SCENE 3 — THE OTHER SIDE
02:45–03:40

SHOT 17 — Return to reality
```

Timeline: 02:45–02:57
Camera: Extreme close-up, 85mm.

```text
Match the opening of Maha's eyes from the previous shot.

Real Maha's eyes open in front of the old mirror.

The warm mirror-world is gone.
The reflection now shows Real Maha wearing her faded beige tunic.

Her expression is quiet and tired.

The room returns to the muted, worn reality of the original home.

Use cool dawn shadows and the same face reference.

The camera is locked.
Her gaze shifts slightly toward the mirror.

No transformation effect.
No face morphing.
The transition is created through the edit.
```

SHOT 18 — Mother calls
Timeline: 02:57–03:12
Camera: Medium shot, 50mm.

```text
Maha stands near the old mirror in the real rural home.

She hears her mother calling from another room.

Maha turns her head toward the sound, pauses briefly, then turns away from the mirror and walks out.

Her movement is restrained.
Her face shows quiet resignation.

The mirror remains behind her in its original position.

Use a controlled, slightly observational camera.
Muted earth colors and dim natural dawn light.

Do not add dialogue or lip movement.
The mother's call will be recorded separately.
```

SHOT 19 — The truck
Timeline: 03:12–03:27
Camera: Wide shot, 24mm.

```text
An old dusty open-bed agricultural pickup waits beside a rural Egyptian road.

Several children are nearby.

One by one, they climb into the rear bed using simple, physically believable movements.

Maha approaches and joins them.

The truck has scratched paint, dusty metal, and the same worn construction as the approved vehicle reference.

Keep the camera at a stable roadside position.

Use natural morning light and muted documentary-style color.

Avoid chaotic crowd movement.
Do not place children in physically impossible positions.
No visible vehicle logos or registration numbers.
```

SHOT 20 — The school bus
Timeline: 03:27–03:40
Camera: Tracking shot, 50mm.

```text
The old agricultural pickup is beside the rural road.

A school bus passes it.

Maha sits in the pickup's rear bed and watches the bus through its windows.

Children inside the bus laugh and move naturally.

Maha's eyes follow the bus as it passes.
Her expression is quiet and longing.

After the bus has passed, the pickup begins moving away.

Use a restrained lateral tracking composition.
Preserve the same vehicle designs and Maha's costume.

Natural morning light and light road dust.
```

Do not make the bus or pickup change shape.
```

---

## SCENE 4 — THE FIELD
**03:40–04:55**

### SHOT 21 — Peanut field
**Timeline:** 03:40–03:53
**Camera:** Wide establishing shot, 24mm.

```text
A wide view of a rural peanut field beneath harsh midday sunlight.

Children work among low green peanut plants and dry uneven soil.

Maha is visible among them in her faded beige tunic and dark olive trousers.

The children bend, gather, and work with repetitive physical movements.

The field feels large and exposed.
The children remain small within the landscape.

Use a static observational camera.
Hard natural sunlight, muted earth tones, subtle heat haze.

This must feel like a real agricultural working environment in rural Egypt, not a stylized cinematic fantasy landscape.

No exaggerated suffering.
```

SHOT 22 — Hands in the soil
Timeline: 03:53–04:08
Camera: Extreme close-up, 85mm.

```text
Extreme close-up of Maha's small hands digging through dry soil around peanut plants.

Her fingers loosen the earth and lift a small amount of soil.

Fine dust falls naturally between her fingers.

The hands must remain anatomically correct and consistent throughout the movement.

Use harsh overhead sunlight and detailed natural soil texture.
```
```

The camera remains close and steady.

Focus on the physical texture of the work rather than dramatizing pain.
No extra fingers, hand deformation, or unnatural movement.
```

### SHOT 23 — Heavy sack
**Timeline:** 04:08–04:23
**Camera:** Medium shot, 50mm, restrained handheld.

```text
Real Maha struggles to lift and carry a heavy agricultural sack in the peanut field.

She bends, grips the sack, and tries to raise it.
Her shoulders and arms show realistic effort.

She manages to move it forward.

The supervisor stands in the background, distant and slightly out of focus.
He makes one impatient gesture.

Maha does not look toward the camera.

Use restrained handheld movement, harsh sunlight, dust, and natural heat haze.

Keep the supervisor distant and realistic, not a theatrical villain.

Preserve Maha's face, clothing, and child proportions.
```

SHOT 24 — The yellow-dress vision
Timeline: 04:23–04:39
Camera: Close-up / layered composition, 85mm.

```text
Real Maha pauses in the peanut field and slowly looks toward the horizon.

In the distance, through subtle heat distortion, the same girl appears wearing the sunshine-yellow cotton dress and red ribbon.

Mirror Maha holds a schoolbook close to her body.

She looks toward Real Maha with a gentle, peaceful expression.

The vision should feel like a brief visual interruption in Maha's perception.

Keep Mirror Maha's face identical to Real Maha.
```
```

Do not make her a ghost.
Do not make her transparent.
Do not add glowing outlines, particles, magic effects, or fantasy light.

The field remains visible and physically real around her.

Use a controlled close-up with the vision placed in the background.

The camera remains almost still.
```

### SHOT 25 — The vision disappears
**Timeline:** 04:39–04:55
**Camera:** Medium close-up, 50mm.

```text
Real Maha blinks.

When she opens her eyes, the yellow-dress figure is gone.

She lowers her gaze, turns back toward her work, and continues handling the agricultural sack.

Her expression is quiet and exhausted.

Keep the field and lighting consistent with the previous shot.

Use restrained handheld camera movement.

Do not show the vision transforming, dissolving, or morphing.
It is simply absent after Maha blinks.

End with Maha continuing to work.
```

SCENE 5 — THE JOURNEY HOME
04:55–05:35

SHOT 26 — Climbing into the truck
Timeline: 04:55–05:05
Camera: Wide shot, 35mm.

```text
At sunset, the same old agricultural pickup waits beside the rural field.

The children finish work and climb into the rear bed.

Maha joins them, visibly tired.

The vehicle design, scratched paint, metal bed, and worn tire must match the approved truck reference.

Use a stable roadside camera.

Warm dusty sunset light, muted orange and brown tones.

Keep movements simple and physically believable.
No chaotic crowd movement.
```

SHOT 27 — Exhausted Maha
Timeline: 05:05–05:14
Camera: Close-up, 85mm.

```text
Maha sits quietly in the rear of the moving pickup.

She leans lightly against the metal side.

Her face is dusty, her hair slightly untidy, and her eyes heavy with exhaustion.

The truck's movement creates subtle natural vibration in her body and clothing.

She looks down briefly, then toward the road.

Use a close, intimate portrait with natural sunset light across her face.

Keep her identity and clothing exact.

No crying.
No exaggerated fear.
No dramatic camera shake.
```

SHOT 28 — Rear tire
Timeline: 05:14–05:24
Camera: Extreme close-up, 85mm close-focus.

```text
Low-angle extreme close-up of the rear tire of the same old agricultural pickup as it rotates along a rough rural road.

The tire rolls over small stones and uneven ground.

Dust rises naturally behind it.
The scratched metal bodywork vibrates subtly.

Keep the tire's shape, tread, and vehicle construction consistent with the approved truck reference.

Use realistic motion and natural sunset highlights.

The camera tracks alongside the tire briefly.

Build tension through the physical movement and sound atmosphere, not through exaggerated visual effects.
```

SHOT 29 — Headlights
Timeline: 05:24–05:35
Camera: Extreme close-up, 85mm.

```text
Extreme close-up of Maha's eyes inside the moving pickup.

Bright approaching headlights appear reflected in her dark brown eyes.

She notices the light and looks up suddenly.

Her expression shifts from exhaustion to brief alarm.

Keep the camera on her face only.

The headlights become brighter in the eye reflection.

End on a stable close-up suitable for a hard cut to complete black.

ABSOLUTELY DO NOT SHOW:
A collision.
An impact.
A vehicle crash.
Vehicle damage.
Flying glass.
Injured children.
Bodies.
Blood.
Any graphic accident imagery.

The accident must happen entirely off-screen.

Do not generate a crash sequence.

Do not generate a visual impact.
The cut to black will be created in editing.
```

SCENE 6 — THE LAST REFLECTION
05:35–06:20

SHOT 30 — Mother in grief
Timeline: 05:35–05:46
Camera: Static wide shot, 35mm.

```text
Night inside the same deteriorating rural home.

Maha's mother sits alone, holding a small piece of her daughter's clothing.

She is dressed in simple dark clothing.

Her body is almost completely still.
Her fingers move slightly around the fabric.
Her breathing is subtle.

The old rectangular mirror remains on the same wall in its original position.

The room is quiet and dark, with restrained cool blue-grey shadows and minimal practical light.

Use a completely static camera.

The mother's grief is expressed through stillness, not theatrical crying.

No other characters.
No additional objects.
```

SHOT 31 — Approaching the mirror
Timeline: 05:46–05:57
Camera: Medium close-up, 50mm.

```text
Maha's mother slowly looks toward the old rectangular mirror.

She holds the piece of clothing close to her body.

After a brief pause, she carefully rises and takes a few slow steps toward the mirror.
```
```

Her movements are heavy and restrained.

Use a gentle, controlled camera move following her approach.

Preserve the room geometry, wall cracks, mirror frame, window, and furniture.

Cool night shadows.
A faint practical light touches her face.

No sudden gestures.
No exaggerated crying.
```

### SHOT 32 — The last reflection
**Timeline:** 05:57–06:08
**Camera:** Over-the-shoulder, 50mm.

```text
Over-the-shoulder shot from behind Maha's mother as she looks into the old rectangular mirror.

Inside the mirror, Mirror Maha appears wearing the exact sunshine-yellow cotton dress and small red ribbon.

She holds her schoolbook.

She has the same face, age, eyes, eyebrow scar, and hair as Real Maha.

Mirror Maha looks directly at her mother.

She does not smile.
She remains still and quietly present.

The mother slowly raises one hand toward the glass.

The reflection must be geometrically correct and remain within the mirror.

Use restrained magical realism:
cool blue-grey shadows around the mother, with a very subtle warmer natural tone inside the reflection.

No glow, no particles, no ghost effects, no fantasy portal.

Hold the emotional moment.
```

SHOT 33 — Reflection disappears
Timeline: 06:08–06:20
```

Camera: Intimate close-up, 85mm.

```text
Intimate close-up of the mother's hand slowly touching the mirror glass.

Inside the reflection, Mirror Maha raises her hand and gently places it against the other side.

Their hands align through the glass.

The mother remains close to the mirror.

A very fine, delicate crack begins to appear in the glass near the point of contact.

The girl remains recognizable and still as the reflection begins to fade.

Do not morph her face.
Do not distort her facial features.
Do not create random large fractures.
Do not make the glass explode.

The mother reaches slightly forward as the reflection disappears.

Keep the camera steady and the lighting restrained.

The actual crack and disappearance can be refined or composited in post-production.

End on the mother reaching toward the now-empty mirror.
```

SHOT 34 — FINAL BLACK
Timeline: 06:20–06:35
Generation: Static black frame.

```text
Pure black screen.

No visible imagery.
No characters.
No objects.
No reflections.
No gradients.
No text.
No logos.
No animation.

Hold complete black for the entire clip.
```

All final sound, voice, school bell, children laughing, and typography will be added in post-production.
```

---

# PART 3 — FLOW CONTINUITY WORKFLOW

## 1. Prepare your reference library

Before generating the video, upload or organize these approved references:

- MAHA_01 — definitive face and character reference.
- MAHA_REAL — faded beige tunic and dark olive trousers.
- MAHA_MIRROR — yellow dress and red ribbon.
- MOTHER_01 — mother character reference.
- FATHER_01 — father character reference.
- SUPERVISOR_01 — supervisor character reference.
- ENV_01 — real rural house.
- ENV_02 — mirror-world house.
- ENV_03 — village road.
- ENV_04 — school and classroom.
- ENV_05 — peanut field.
- ENV_06 — agricultural pickup.
- ENV_07 — final night interior.
- PROP_01 — old rectangular mirror.
- PROP_02 — yellow dress and red ribbon.
- PROP_03 — notebook and pencil.
- PROP_04 — abandoned sandal.
- PROP_05 — backpack.
- PROP_06 — scratched metal cup.

Use the same approved reference images throughout production.

## 2. Generate each shot

For each shot:

1. Open Google Flow and create a new video generation.
2. Choose image-to-video when an approved storyboard frame is available.
3. Upload the correct storyboard frame as the starting image.
4. Add the relevant character and environment references using the available reference/ingredient controls.
5. Paste the matching shot prompt.
6. Select landscape 16:9.
7. Generate a short clip with one clear action.
8. Review the result for face identity, costume, hands, background, and camera stability.
```

9. Keep the best take and generate alternatives only when necessary.

Important: Do not expect one long generation to reproduce every action in a 9–16 second storyboard shot. Split complicated actions into shorter clips and assemble them in the edit.

3. Use start and end frames strategically

For shots that contain a clear beginning and ending state, use approved frames for both ends when the Flow workflow supports them.

Examples:

- Shot 04: Maha washing her face → Maha looking into the mirror.
- Shot 06: Fingertips separated → fingertips touching.
- Shot 09: Ribbon untied → ribbon secured.
- Shot 14: Maha running → friend helping her up.
- Shot 16: Maha's eyes open → eyes closed.
- Shot 33: Hands approaching the glass → empty mirror.

Do not use unrelated images as start and end frames. They can cause unwanted morphing.

4. Split these difficult shots into separate clips

Shot	Recommended split
04	Washing face / raising head
05	Establish reflection / reflection smiles
06	Hands approach / fingertips touch
09	Ribbon being tied / final adjustment
11	Father pours milk / family interaction
12	Walking / joining friends
14	Playing / falling / friend helps
16	Mother approaches / forehead kiss
18	Mother calls / Maha turns and leaves
19	Children approach / children climb
20	Bus passes / Maha watches / truck moves
23	Maha lifts sack / carries sack
24	Maha looks up / vision appears
25	Vision absent / Maha resumes work
29	Headlights appear / Maha reacts
31	Mother notices mirror / approaches
33	Hands touch / crack begins / reflection disappears

For these, separate clips will usually be easier to control than a single generation containing several movements.

5. Special VFX shots

Shots 05, 06, 24, 32, and 33 are the highest-risk generations.

For the mirror scenes:

- Keep the mirror environment and camera angle fixed.
- Use the same Maha reference for both versions.
- Generate the reflection separately if Flow produces incorrect mirror geometry.
- Composite the reflection into the mirror in DaVinci Resolve or After Effects when needed.
- Add the fine glass crack in post-production.
- Create the disappearance through masking and opacity animation rather than asking Flow to morph Maha's face.

For Shot 24, the yellow-dress vision should be brief and subtle. If Flow makes her look like a ghost, regenerate with a more natural, distant human figure and remove the supernatural visual effects.

PART 4 — POST-PRODUCTION AUDIO AND EDITING

Do not ask Flow to generate the entire soundtrack. Generate clean visuals and build the final soundscape separately.

Time	Audio direction
00:00	Distant rooster, passing vehicle, child's breathing
00:08	Quiet interior room tone
00:25	Water splash and soft footsteps
00:35	Very subtle tonal transition
00:55	Morning birds and domestic ambience
01:34	Plates, milk pouring, family laughter
01:48	Footsteps and friends greeting
02:00	Classroom ambience
02:13	Children playing
02:37	Soft fabric movement and mother's kiss
02:45	Return to quiet reality
03:12	Truck engine and metal vibration
03:27	School bus passing and children laughing
03:40	Wind, insects, distant machinery
04:08	Sack dragging, footsteps, supervisor
04:23	Sound briefly muffles during the vision
04:55	Truck engine and children settling
05:14	Tire noise and suspension vibration
05:24	Approaching headlights, scream, impact sound, hard cut
05:35	Silence, then distant siren
05:46	Quiet room tone and mother's breathing
05:57	Subtle glass resonance

| 06:08 | Fingertips touching glass and tiny crack |
| 06:20 | Silence, then children laughing and school bell |

Dialogue to record separately

- Mother: “Maha... wake up.”
- Mother: “Maha! Hurry up!”
- Supervisor: “Faster! Keep working!”
- Mother: “Maha...”
- Child voice: “Teacher, I'm finished.”

Use understated, natural English performances. Avoid theatrical delivery.

Final typography

Add all text in the editing application, not in Flow.

First message:

EVERY CHILD DESERVES A CHILDHOOD.

Second message:

Sometimes poverty doesn't steal a child's future.

It steals the childhood that was supposed to build it.

Final title:

MIRROR MIRROR

A SHORT FILM

PART 5 — FINAL QUALITY CONTROL

Before approving any clip, check:

- [ ] Maha's face matches the approved character reference.
- [ ] Maha remains exactly ten years old.
- [ ] Her eyebrow scar remains in the correct position.
- [ ] Her hair and skin tone remain consistent.
- [ ] Real Maha wears the correct beige tunic and olive trousers.
- [ ] Mirror Maha wears the same yellow dress and red ribbon.
- [ ] The mirror retains its original rectangular shape and wooden frame.
- [ ] Reflections behave naturally.
- [ ] Hands and fingers are anatomically correct.

- [ ] The home, road, field, and truck remain consistent.
- [ ] No accidental readable text appears.
- [ ] No subtitles or logos are generated.
- [ ] No collision or graphic accident imagery appears.
- [ ] Camera movement is controlled and physically plausible.
- [ ] The clip has a clean beginning and ending for editing.

Production priority: Test Shots 02, 05, 06, 17, 24, 32, and 33 before generating the entire film. These shots reveal whether the identity, mirror, and two-world continuity are reliable enough for production.

The goal is not to make every shot visually spectacular. The goal is to make every shot feel as if it belongs to the same carefully directed live-action film.

A note about the additional two-girl ending

The 34-shot blueprint you supplied ends on black at 06:20–06:35. In our earlier development, you also requested a final image of Real Maha and Mirror Maha standing side by side, divided by a mirror crack, with the voice-over:

> “Mirror, mirror, don't you lie… Which life should have been mine?”

That scene is not included in the 34-shot blueprint above. I recommend treating it as an optional Shot 35, after the mother's final reflection, if you still want that version of the ending. It would extend the film beyond the original 6:35 target.
